Transparency and Open Government

MEMORANDUM FOR THE HEADS OF EXECUTIVE DEPARTMENTS AND AGENCIES

SUBJECT: Transparency and Open Government

My Administration is committed to creating an unprecedented level of openness in Government. We will work together to ensure the public trust and establish a system of transparency, public participation, and collaboration. Openness will strengthen our democracy and promote efficiency and effectiveness in Government.

Government should be transparent. Transparency promotes accountability and provides information for citizens about what their Government is doing. Information maintained by the Federal Government is a national asset. My Administration will take appropriate action, consistent with law and policy, to disclose information rapidly in forms that the public can readily find and use. Executive departments and agencies should harness new technologies to put information about their operations and decisions online and readily available to the public. Executive departments and agencies should also solicit public feedback to identify information of greatest use to the public.

The Desal Prize

DOWNLOAD THE DESAL
PRIZE FAQ

SIGN UP FOR DESAL
PRIZE UPDATES

On April 22, 2015, the Desal Prize announced the competition's winning teams. [View the Desal Prize winners and their projects here](#). The winning teams were selected through a head-to-head competition April 9-11, 2015 at the Bureau of Reclamation's Brackish Groundwater National Desalination Research Facility in Alamogordo, New Mexico. The winning teams will also be invited to submit applications to receive grant funds to pilot their technology in a USAID mission region in a developing country.

On April 6-12, 2015, the Desal Prize descended on Alamogordo, NM for a week of rigorous testing and competition. The competitors? Five teams from around the globe working to prove their technology could help farmers in the developing world turn dirty, brackish water into clean, usable water for crops, livestock and human consumption using only energy from the sun. Surrounded by trillions of gallons of brackish water in the Alamogordo Basin, the teams had their work cut out for them.

Gathering at the Brackish Groundwater National Desalination Research Facility (BGNDF), the five teams were tasked with two separate 24-hour testing periods to run their systems. The goal was lofty—to produce the highest percentage of potable and agriculture use water and effectively use only renewable energy to power their systems. With \$200,000 in prize funding and a chance to pilot in a USAID mission region on the line, the stakes were high.

Revisiting EFSA@EXPO: crowdsourcing, crystals and communities

Openness in science is not new, but society is demanding that science opens up more. Public bodies, consumers and other stakeholders want a voice in risk governance as a whole, from the beginning onwards, not just at the end. Escalating volumes of data require new ways of approaching assessment and analysis. Innovative companies and online communities, among others, can help to develop tools to meet these challenges. The session brought together some of the latest open assessment models and tools that are emerging.

Fact Sheet: Building the First Link to the Force of the Future

On his first day in office, Secretary Carter announced his goal to build the Force of the Future in order for the Department of Defense to maintain our competitive edge in bringing in top talent to serve the nation. In March, Secretary Carter delivered a speech at his high school in Abington, Pennsylvania to discuss some of the goals for this initiative. Following those remarks, Secretary Carter directed the Acting Under Secretary of Defense for Personnel and Readiness, Brad Carson, to undertake a comprehensive review of the Department's civilian and military personnel systems.

The review occurred from April to August, and included over 150 subject matter experts from the Military Services, scholars, and researchers. A core research and writing team from the Personnel and Readiness office reviewed over 100 studies and commission reports related and military personnel management, talent management, and private sector human resources. The department could increase permeability of personnel management results and outcomes for the quality of talent and the quality of work force.

Contact us if you have any questions about the Skills Marketplace Program or have any questions about

Welcome to the Skills Marketplace Portal! Using the Skills Marketplace Portal is simple...

Manage Skills Marketplace Profile

- ▶ Sign-up to receive email alerts
- ▶ Access all the project opportunities that you have applied to
- ▶ Access the applications that have been submitted to project opportunities that you have posted

Find Open Project Opportunities

- ▶ Browse open project opportunities
- ▶ Search by keywords
- ▶ Search by Office or Type of Project

Post New Project Opportunities

- ▶ Post a new project opportunity that other colleagues can apply to join

Please remember, only projects approved through your AAship/Regional Office's project approval process may be posted

Share Ideas on Skills Marketplace Projects

- ▶ Have you been keeping an eye out for new opportunities on the Skills Marketplace portal but haven't yet found one that fits your skill set/development goals?
- ▶ Have you participated in one Skills Marketplace project and now can't wait to take another new opportunity?

As supervisors across the agency work on identifying new opportunities to post to the Skills Marketplace, we would like to let them know what types of projects you are

Welcome to the new profile! Have you updated yours?

CRE

TARGETING THE CREDENTIALS OF CITIZENS

From AgriVIVO to AgriProfiles. What is new

What we called AgriVIVO is now **AgriProfiles**!

The new name gives a better idea of what the portal is about: **profiles of experts and organizations** in the field of agriculture. This new version also has enhanced search features. See [what is new!](#)

AgriProfiles is a search portal giving access to profiles of experts and organizations in the field of agriculture, bridging across separately hosted directories and online communities.

The portal is managed by the **Global Forum on Agricultural Research** in collaboration with **Cornell University** and the **Food and Agriculture Organization of the United Nations**.

AgriProfiles is also envisioned as a worldwide effort, expressed in regional, national and institutional collaboration to share professional profiles in an open data environment for agriculture and food security. The **Interamerican Institute for Cooperation on Agriculture** is leading these efforts.

SKILLED EXPERTISE

Quick Introduction

Good (S)martphone (A)ctivated (M)edics uses the latest technologies to alert those with medical training to nearby emergencies so that potentially life-saving interventions can be given before the arrival of emergency services. We aspire to have the highest levels of governance; All responders are checked, approved and their training is confirmed.

Federal Advisory Committee Act

From Wikipedia, the free encyclopedia

The **Federal Advisory Committee Act (FACA)** is a [United States federal law \(Pub.L. 92–463\)](#), 6 October 1972, which governs the behavior of federal advisory committees. In particular, it has special emphasis on open meetings, chartering, public involvement, and reporting.^[1] The U.S. General Services Administration (GSA) oversees the process. During fiscal year 2008, GSA reported 917 active committees composed of almost 64,000 members that provided advice and recommendations to 50 [federal agencies](#). Financially, the cost of these committees amounted to \$344.3 million in fiscal year 2008.^[2]

Paperwork Reduction Act

From Wikipedia, the free encyclopedia

The **Paperwork Reduction Act of 1980** (Pub. L. No. 96-511, 94 Stat. 2812, codified at [44 U.S.C. §§ 3501–3521](#)) is a [United States federal law](#) enacted in 1980 designed to reduce the total amount of paperwork burden the federal government imposes on private businesses and citizens. The Act imposes procedural requirements on [agencies](#) that wish to collect information from the public. It also established the [Office of Information and Regulatory Affairs](#) (OIRA) within the [Office of Management and Budget](#) (OMB), and authorized this new agency to oversee federal agencies' collection of information from the public and to establish [information policies](#). A substantial amendment, the **Paperwork Reduction Act of 1995**,^[4] confirmed that OIRA's authority extended over not only agency orders to provide information to the government, but also agency orders to provide information to the public.^[5]

Paperwork Reduction Act of 1980

Long title An Act to reduce paperwork and enhance the economy and efficiency of the Government and the private sector by improving Federal information policymaking, and for other

Create New Systems of Credentials

The quality distinctions often made in higher education are largely rhetorical without proven measurement tools for defining learning outcomes. The credentialing system of the 21st century demands a national framework for defining quality and learning-based pathways to new credentials.
